

Crane Operator / Maintainer

Must have completed an Engineering Maintenance Level 2 NVQ and hold a current Stage 3 Sparrows Offshore Crane Operator Certificate or an equivalent Stage 4 certificate along with previous experience within a similar role.

You will be expected to competently operate platform pedestal cranes under the direction of nominated client personnel in accordance with the authorised operators instruction manual, platform operating procedures and the Company's Quality Assurance Manual.

You will also be required to carry out daily routine first line crane maintenance duties including rope change-outs, greasing, lubrication, oil changes and other crane machinery lubrication duties in accordance with the maintenance routines, manufacturers manuals and service charts.
